Maryam Dadashpoor

Front-end Developer

GitHub: Mrymindigo
LinkedIn: maryamindigo07

Junior Front-End Developer with hands-on experience building responsive web applications using React, Next.js, and JavaScript (ES6+). Experienced in developing user-friendly interfaces, implementing client-side routing, and creating responsive layouts through practical projects. Familiar with Git, Vite, and modern front-end development workflows, with a strong interest in building clean and maintainable web applications.

Skills

Framework & Libraries	React, Next.js, Tailwind CSS, Material UI, Bootstrap, Sass
Languages & Styling	JavaScript (ES6+), TypeScript, HTML5, CSS3
tooling & Collaboration	Git, GitHub, Figma, Vite, npm

Technical Experience

Front-end Developer Intern **Winter Jan 2025 — Mar 2025**
Idechy *Tehran*

- Worked on real-world web projects under the guidance of a front-end mentor.
- Developed and customized different sections of websites using WordPress, HTML, CSS, Sass, and JavaScript.
- Implemented responsive layouts to ensure compatibility across different screen sizes and devices.
- Developed and improved website pages and components based on project requirements and designs.
- Used jQuery when needed to implement interactive functionality and modify existing website components.

Projects

Real Estate Website **GitHub**
Next.js, React, JavaScript, Sass

- Developed a responsive real estate website using Next.js and React with a reusable component-based architecture.
- Implemented property listing and dynamic property detail pages using the Next.js Pages Router and dynamic routes.
- Structured reusable UI components and mock property data to create a multi-page real estate browsing experience.

Admin Dashboard **GitHub**
React, React Router, Tailwind CSS, Recharts

- Built a responsive admin dashboard using React with reusable components and a feature-based project structure.
- Implemented client-side navigation with React Router and interactive data visualization using Recharts.
- Developed dashboard sections including summary cards, charts, recent products, users, tickets, and comments.

SoftDay E-commerce Website **GitHub**
Next.js, React, TypeScript, Tailwind CSS

- Developing a responsive e-commerce website using Next.js App Router, React, and TypeScript.
- Built reusable UI components including responsive navigation, hero sections, category sliders, and dynamic category pages.
- Implemented a Persian RTL interface with custom styling, responsive layouts, and interactive UI elements using Tailwind CSS and Swiper.js.
